

I kindly urge you to consider quashing the petition (04-160) of the National Association of Broadcasters which seeks to stop satellite radio, specifically XM Radio, from offering Instant Traffic & Weather. I enjoy the services provided by XM radio and I am willing to pay a monthly fee for these services. I do so because the variety of XM's product far exceeds anything offered by the members of the National Association of Broadcasters. The petition is obviously contrary to the free enterprise system. I will not allow the National Association of Broadcasters to determine what I hear on the airways, especially if I am paying for it. Please reject this petition. Thank you.
